- Further CIS located on not thermal side for ticket serial number reading (optional)
- WiFi dongle (external)

MULTI BIN

- Triple paper stock bin to manage three kind of tickets.**
- Increasing paper capability
 - Flexibility of offered services
 - Saving space on the desk
 - Saving space in the self-service kiosk

Two working ways:

Single mode: it is possible to use the same kind of paper for the three paper loadings available.

Mixed mode: it is possible to use a mix of different paper. Reduced footprint through a single printer instead of 2.

VERIPRINT® TECHNOLOGY

Printing head with integrated scanner.

- Read the barcode on the ticket
- Verify the correct printing
- Save the image

The VeriPrint® system makes a print and save in real time of the digital image of the issued ticket. During the ticket printing phase, the embedded scanner automatically takes the ticket's image. This image can be memorized inside the printer in a mass memory (MMC, SD) or can be sent to the remote host.

BENEFITS

- Automatic storage of the tickets' images in local databases for future sending to the central server
- Retrieval of the original and compliant ticket image for possible objections
- Costs reduction of printed paper
- Check of the correct issuing of printed document
- Images capture from remote host through a Web Browser (Ethernet version)

RFID TECHNOLOGY

- Both HF - short distance - and UHF - long distance.
- Same printing module for the OFFICE and for the KIOSK => easy to integrate in sw platforms
- Multifeder available for handling RFID tickets and standard paper => multi tickets support
- Built-in 3 SAM management=> higher security in less space
- HIGH MTBF => low ownership cost

STANDARD SUPPORTED

HF

- MIFARE
- ISO 14443A (Mifare 1K, 4K and Ultralight)
- ISO 15693
- i-Code
